Timeline Analysis

Realistic Estimate: 20.8 days
This accounts for task dependencies, resource constraints, and risk factors.

Optimistic (Critical Path): 16.0 days
Best-case scenario with unlimited resources and no delays.

Sequential (Worst Case): 20.8 days
If all tasks must run one after another.

Critical Path Analysis

The critical path contains **4** tasks with a total duration of **16.0 days** (adjusted: **20.8 days**). These tasks directly impact the project timeline and should be monitored closely.

Critical Path Tasks:

- Requirements Analysis
